

Operation Civil Olympics

Japanese->[市民五輪作戦](#)

We did not wish to watch neither the torch relay with angry protests or our own representatives honourably receive their medal by the same people who supported genocide in Tibet In bloody Olympics of China.

Members of public in japan succeeded to boycott the starting ceremony of torch reley by a peaceful protest. It shows that we can still reshape our Olympics to the shape we wish to have.

When the IOC choose China for the host counrty of next Olympics , they made China to promise to improve on human rights issues.

So,naturally they still have sole responsibility to negotiate with China.
(We wish that we do not have to campaign for the new IOC! ”)

Our effort do not just stop there, we call for your help on creating a contact list of all associated bodies such as sponsors and supporters are like to meet as much protest as possible .

To IOC (or your own country's Olympic committee)
IOC <http://www.olympic.org/>

Mr J Rogge (or insert a name of your own Olympic committee chair)

In light of the IOC's Olympic Truce commitment "to create a window of opportunities for dialogue, reconciliation and the resolution of conflicts...and to encourage political leaders to act in favour of peace" (www.olympic.org), it is clear that the IOC ideals and values are very applicable for Tibet as we approach the 2008 Games. The IOC has long contended that awarding Beijing the 2008 Games will improve human rights in China, but as we have seen in the past month,this is clearly not the case.

I do not believe that the China, with a clear violation of human rights condition in Tibet is simply fit to be the host country for the Olympics.

If the Olympics must go ahead in China, I urge you to demend the following conditions.

1; An immediate end to the current crackdown and any persecution within Tibet and the release of all those who have been arrested and detained and Provide the provision of proper medical treatment to the injured.

2; immediate lift to the media black out and foreign journalists be allowed unfettered access to Tibet and Tibetan regions of China.

and sending of an independent international body, to investigate the unrest and its underlying causes.

3; unconditional talk with the Dalai lama to negotiate full autonomy for the Tibetan people by calling on the Chinese government to hold the next round of negotiations with the Tibetan government-in-exile in a third country, attended by independent observers.

If these demands are not met , I believe you must object the china's right to host the Olympics , and start to explore other places and time to open this years Olympics outside of china.

(Please add your personal requests and views to these points)

yours sincerely,
(your name)

Wishing for the world peace means changing our existing world, right? So let's get going and participate and be proud of ourselves,we all have a right to declare " I made a difference " . Don't you think it will be so cool to boast to our kids and grand-kids , " We have changed the course of the Olympics once for human rights and peace " ?

Please spread this campain by forwarding this email to all bulletin board of your community and friends .

Please also send us a contact information of your country's Olympic committee and it's associated groups for our campaign list.

Thank you.

OPERATION CITIZEN'S OLYMPICS Open letter by Zali

Do we have no choice?

No, it is not true.

We still have infinite possibility in our hands.

Are you going to watch the Olympics as if nothing ever happened?

Do you want to keep going with your eyes closed on what is happening in Tibet?

We believe we can change anything we wish to change.

Today, we ask you to give us a helping hand .

Was this the Olympics we really want to watch?

We have succeeded on our " Operation Zenkou-ji " which lead the historical Japanese Buddhist temple Zenkou-ji to withdraw from plans to host Japan's opening stage of the Olympic torch relay and the city of Nagano was forced change the route .

Zenkou-ji bravely made a public statement for the world peace and human right violation in Tibet despite a pressure form China, the government of Japan and the local authority.

Ordinary members of public have participated in this operation by sending messages of protest to the temple and also to the wide range of groups and bodies associated with the torch relay such as the lay group of the temple, sponsors of the event , resident groups of the area and others by email, fax, phone and postcard.

These sincere massages reached a huge number.

As a result , together with the solidarity shown by the group of young monks of the temple , the Zenkou-ji temple had made a above decision.

What we learned from this, is something profoundly positive to let us understand that the even what seems to be impossible to change, such as a schedule of the Olympics can be changed when we , the ordinary members of public put our powers together.

We can boycott the torch all together if we want.

There is still sometime left do and it is too early to give up on this.
You do not have to watch the China's Olympics with regret.

We also hear a voice like this,
It will be going ahead in Beijing anyway after all ,right?
" China had promised to improve on human right issues, but they failed to respond ,so they don't deserve to host it "
What? don't you feel a pity for all the athletes who worked so hard for the olimpics?
" Do it in somewhere else? "
They won't be anywhere else.
" Can it's be postponed? "
" That won't be the olimpics, then "
" Can we amend the rules of the olimpics? "

What we wanted to portray through the effort of operation Zenkou-ji is that WE CAN STILL NEGOTIATE WITH CHINA USING THE OLYMPICS.

Is it ok to change the host country or postpone the Olympics for a year?
Don't you think it will be so cool to boast to our kids and grand-kids
" We have changed the course of the Olympics once for human rights and peace " ?

When the IOC choose China for the host counrty of next Olympics , they made China to promise to improve on human rights issues .

So,naturally they still have sole responsibility to negotiate with China.
(We wish that we do not have to campaign for the new IOC! ")

So , let us all unite and demand to the Olympic committee of your own country and IOC weather you think you are right or left, conservative or liberal , for a sake of no more people getting hurt and dying in Tibet.

We do not want to watch bloody Olympics.

We do not wish to watch our own representatives to recieve a medal by the murders.

Our effort do not just stop there, we ask for your help on creating a contact list of all associated bodies such as sponsors and supporters are like to meet as much protest as possible .
